That is not a problem at all. We will break out the WAG information separate: # of orders reviewed; # of orders reported; # of locations inspected, etc.

Maybe just 1x per month --- on your report (probably too many during the month).

Make sense?

I'd just be curious – each month

Do you want to be included in the "us" you reference below?

OK -- thanks Chris.

I'm assuming that you will **let us know** when WAG orders are sent to the DEA -- right?

We are treating WAG locations as any other pharmacy. Thresholds are based upon the \$\$ of Rx purchases. Most of WAG locations will be set as "small." In addition, ABC's Diversion Control / OMP (order monitoring program) Team (Steve, Ed and Joe) met with WAG's Diversion/OMP Team in WAG's HQ in Chicago last Friday to discuss each other's program.

WAG has the ability to set internal thresholds prior to the orders being sent to ABC. The goal would be for WAG to police their own orders and block any order to ABC that would exceed ABC's threshold thus triggering a suspicious order being sent to DEA from ABC.

ABC's OMP Team and WAG OMP Teams will be working closely together to limit the number of reports and immediately address issues as they arise.

Chris

Do we have thresholds established for the WAG locations? Is this based on history?

good report -- plenty going on.

Tim, please find CSRA's Monthly Summary Report for March 2013 attached, along with March's Compliance Incident Report.

Let me know if you have any questions or need any additional information regarding any of the issues listed on either report.

Thanks,

Chris
